

Amendments to the Claims:

The following listing of the claims replaces all previous listings and versions of the claims in this application:

5

Listing of the claims:

1. (Currently Amended) A ceiling fitting ~~or cover~~ for covering a connection of ~~a single~~ an electrical cord to a ceiling surface and for ~~fixating~~ fixing said ceiling fitting ~~or cover~~ to said electrical cord, said fitting comprising

10 a hollow body having an upper circumferential edge and a lower circumferential edge and having an overall configuration tapering from said upper circumferential edge to said lower circumferential edge, said hollow body having an inner surface facing ~~[[the]]~~ an inner space defined within said hollow body, said lower circumferential edge defining an aperture into said inner space~~[[,]]~~; and

15 a plurality of elastically bendable elongated members, each having a proximal end and a distal end and a length exceeding the width of said aperture ~~and each having a proximal end and a distal end~~, the proximal ends of said elastically bendable elongated members being located at said inner surface of said hollow body above said aperture, and said plurality of elastically bendable elongated members being orientated pointing to said aperture and said
20 distal ends of said plurality of elastically bendable elongated members defining a free opening therebetween having a width less than the width of said aperture.

2. (Currently Amended) The ceiling fitting according to claim 1, said hollow body being a symmetrical body having a central axis of symmetry and each of said elastically bendable
25 elongated members defining an acute angle ~~less than 90° such as an angle less than 80°, preferably less than 60°, preferably an acute angle~~, relative to said axis of symmetry.

3. (Currently Amended) The ceiling fitting according to claim 1 ~~any of the claims 1 and 2~~, said elastically bendable elongated members being integrally connected to said hollow body.

30

4. (Currently Amended) The ceiling fitting according to claim 1 ~~any of the claims 1 or 2~~, said plurality of elastically bendable elongated members being integrally connected to a separate

annular body to be received within said inner space of said hollow body ~~and preferably snap-fitted into engagement with said inner surface.~~

5. (Currently Amended) The ceiling fitting according to claim 1 ~~any of the claims 1-4~~, said
5 free opening defining a minimum width, said minimum width constituting less than 90%,
~~such as less than 80%, e.g. less than 70%, preferably less than 60%, such as constituting 50-~~
~~90%, 60-80%, preferably approximately 70%~~ of the width of said aperture.
6. (Currently Amended) The ceiling fitting according to claim 1 ~~any of the claims 1-5~~, said
10 elastically bendable elongated members having a length constituting at least 2 times, ~~prefera-~~
~~bly 2-5 times such as 2-3 times~~ the width of said aperture.
7. (Currently Amended) The ceiling fitting according to claim 1 ~~any of the claims 1-6~~, said
15 elastically bendable elongated members being located at a distance above said aperture equal
to or slightly larger than the length of said members, ~~such as a distance equal to 100-200%,~~
~~such as 100-150%, e.g. 100%-110%, 110%-120%, 120%-130%, 130%-140%, 140%-150%,~~
~~150%-160%, 160%-170%, 170%-180%, 180%-190%, 190%-200% of said length.~~
8. (Currently Amended) The ceiling fitting according to claim 7, said distance constituting at
20 least 10%, ~~such as 10%-20%, 20%-30%, 30%-40%, 40%-50% or approximately 20%-40%~~ of
the overall height of said ceiling fitting.
9. (Currently Amended) The ceiling fitting according to claim 1 ~~any of the claims 1-8~~, said
25 hollow body constituting a unitary hollow body ~~or alternatively being composed of two or~~
~~more hollow body parts which are preferably identical, and which are snapfitted together by~~
~~means of co-operating latching or arresting elements for generating said hollow body.~~
10. (Currently Amended) The ceiling fitting according to claim 1 ~~any of the claims 1-9~~, said
30 hollow body and said elongated members being made by injection moulding molding from
~~the same or from different materials, such as polymer materials~~ selected from the group con-
sisting of polyethylene (PE), polypropylene (PP), polyoxymethylene (POM), acrylonitrile
butadiene styrene (ABS) ~~such as PE, PP, POM, ABS or~~ and combinations thereof.

11. (Currently Amended) The ceiling fitting according to claim 4, said annular body and said hollow body being made from ~~identical materials or from~~ different materials.

12. (Currently Amended) The ceiling fitting according to claim 11, said hollow body being
5 made from ~~polymer a material or metal material such as PE, PP, POM, ABS~~ selected from the group consisting of at least one of polyethylene (PE), polypropylene (PP), polyoxy-
methylene (POM), acrylonitrile butadiene styrene (ABS), or e.g. a aluminium aluminum,
[[or]] and stainless steel, and said annular body being made from a polymer material ~~such as~~
selected from the group consisting of at least one of PE, PP, POM, ABS and preferably being
10 more elastic than the material of said hollow body.

13, (New) The ceiling fitting according to claim 1, wherein the hollow body comprises two or more hollow body parts fixed together by cooperating latching elements.

14. (New) The ceiling fitting according to claim 4, wherein said annular body and said hollow body are made from the same material.
